1 Features

Healthy negative ion: make your room full of an abundance natural negative ions

DRY function: Make dehumidifying in the room when the unit is working in the "DRY" mode .

ESF filter :Trap harmful dust and remove unpleasant odors effectively

Anti-mold filter: Catches most small particles and remove unpleasant odors effectively

Sleep mode: The setting temperature and the indoor noise can be adjusted to a more

comfortable level when you set the "sleep mode" during night sleep

24 Hour timer: Use the timer function to set on, or off, or from on to off, or from off to on

Auto restart: The function permits automatic return to previous operation conditions

Easy clean design: The panel is easy to wash and the airflow vents can be detached without

any special tools for quick cleaning of the inside of the air conditioner

Auto mode : According to the fixed temperature "26 °C", the unit will adjust

the operation mode automatically.

NOTES

- 1 Nominal cooling capacities are based on: indoor temperature 27°CDB/19°CWB * outdoor temperature 35°CDB * refrigerant piping length: 5m * level difference: 0m.
- 2 Nominal heating capacities are based on: indoor temperature 20°CDB * outdoor temperature 7°CDB/6°CWB * refrigerant piping length 5m (horizontal) * level difference 0m.
- 3 Capacities are net, including a deduction for cooling (an addition for heating) for indoor fan motor heat.
- 4 Units should be selected on nominal capacity. Maximum capacity is limited to peak periods.
- 5 The sound pressure level is measured via a microphone at a certain distance from the unit. For measuring conditions: please refer to item 6 of this chapter.
- 6 The sound power level is an absolute value indicating the "power" which a sound source generates.
- 7 Energy label: scale from A (most efficient) to G (less efficient).
- 8 The energy label Directive 2002/31/EC will enter into force once the relevant measurement standard will be published in the European official Standard.
- 9 Annual energy consumption: based on average use of 500 running hours per year at full load (= nominal conditions)
